EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey Hopkins (reg #53034) on 5/25/2005.

The application has been amended as follows: In claim 32, line 9, after "pixel electrodes", --at a portion other than the edge -- has been inserted.

In claim 32, line 9, after "pixel electrodes", --at a portion other than the edge -has been inserted.

In claim 47, line 9, after "pixel electrodes", --at a portion other than the edge --

In claim 52, line 9, after "pixel electrodes", --at a portion other than the edge -has been inserted.

In claim 53, line 9, after "pixel electrodes", --at a portion other than the edge -has been inserted.

The following is an examiner's statement of reasons for allowance:

None of the prior art taught or suggested the claimed device where the signal line overlaps the pixel electrode at a region other than the edge and

32) the data line overlaps said orientation dividers within formation regions of the associated pixel electrodes.

47) the data line overlaps said orientation dividers within formation regions of the associated pixel electrodes.

- 52) an end of at least a portion of said color filter extends outward from an end of the associated electrode among said plurality of pixel electrode by approximately 1 um.
- 53) at least a portion of said color filter electrode among said plurality of pixel electrodes is formed larger than the associated electrode among said plurality of pixel electrodes.

Kadota 6031512- shows the color filter structure at least approximately similar to claims 52-53, however does not show and no applicable reference taught overlapping the pixel and data line at a region other than the edge.

Yoshida et al EP0884626 shows the overlap of the dividers and the signal lines (many of the multitude of embodiments show this), however does not show and no applicable reference taught overlapping the pixel and data line at a region other than the edge.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth A. Parker whose telephone number is 571-272-2298. The examiner can normally be reached on M-F 10:30-6:00.
